# Sea Hill's Casanova's War Admiral

What would Admiral's bloodlines do to enhance your herd? His grandsire is Peruvian Bueno, the legendary producer of more Get of Sires than any male in the country. Admiral's sire is an AOBA color champion and 2003 All American Futurity Herdsire of the Year. Admiral's half brother, Snowmass Nova, was 2005 Futurity Dark Herdsire of the Year and sold for over \$300,000. It was the first time sire and progeny have won Herdsire of the Year. Admiral's maternal half sister, Orchid, won 1st place Gray Juvenile and Reserve Champion out of 12 at the Big E 2003. With over half of his sire's offspring being gray or black combined with his full Bolivian black dam who has all but one gray or black crias, Admiral offers superior black and gray genetics along with perfect conformation and fine fleece. Admiral has four crias on the ground. His two Sea Hill girls did very well in the show ring. Judge Vandenbosch called Mizzen "a handspinner's dream," and Tempest took a blue halter ribbon in her first show. This is a great opportunity, so reserve your breeding now!

***Stud Fee: \$1500***

Larry Johnson

# Jed's Sebastian

Sebastian is very special boy! Not only does he have super-fine (see fiber analysis) crimped med. silver grey fleece and an excellent temperament, but both his parents are grey, as are all 4 of his grandparents. His paternal grandsire is the famous Peruvian Macusani and his maternal Grandsire is The Silversmith.

Sebastian easily settled his first female at a precocious 23 months old and Lilian was born June 2004 - a lovely true-black girl! He has since had several beautiful, mostly black or grey crias.
